

Bringing Tech to Western New York

ABOUT FOUNDRY

Foundry was created in Rochester, NY to meet the institutional demand for better capital access, efficiency, and transparency in the digital currency mining and staking industry. We tap into our institutional expertise, capital, and market intelligence to empower participants within the crypto ecosystem by providing the tools they need to build tomorrow's decentralized infrastructure.

OUR NEW YORK PRESENCE

Founded in Rochester, Foundry's mission is to bring high paying technology jobs directly to the community. Growing from 2 employees to 100 since 2019, we've found talent from every corner of the state and have leveraged universities across New York to build our team. As the largest digital currency company in Western New York, our presence has helped spark a resurgence of jobs and opportunity for Foundry employees and the communities we serve.

- Great Place to Work Certified

WHAT'S COMING IN 2022 FOR FOUNDRY AND NEW YORK STATE

GROWTH PLANS

Foundry plans to add 100+ jobs across Western New York in 2022, building upon the 90+ jobs we added to the region in 2021.

BUFFALO EXPANSION

Buffalo is a prime source for professional talent. We plan to expand into downtown Buffalo in 2022, with 50+ high paying tech jobs.

FOUNDRY ACADEMY

Foundry prioritizes industry education and focuses on technical training specific to the mining industry. Through the upcoming Foundry Academy, up to four cohorts per year will attend in-person sessions in Rochester with the goal of full-time placements upon graduation.

ROC THE BLOCK

As a company dedicated to our local community, ROC the Block is an inner-city Rochester mining initiative funded by Foundry. The program will recruit, educate and train recent graduates from the Rochester City School District, introducing them to our industry and paying above-average salaries. By providing both employment and support, we hope to offer new opportunities to a traditionally disenfranchised subset of the city's population.

OUR CEO, MIKE COLYER

Mike founded Foundry in October 2019. A Rochester native, Mike graduated from SUNY Buffalo with a BS in Civil Engineering and an MBA in Corporate Finance. Mike fell in love with the egalitarian spirit of the crypto currency industry and quickly took on the challenge of building his company in his hometown of Rochester, NY. In 2007, Mike and his wife, Lisa, co-founded the Clairebear Foundation, a non-profit that supports families with sick children. Mike is passionate about keeping Foundry in Western New York and creating new opportunities for New Yorkers.
